(762) 436-9384

November 13, 2018

Dear Hiring Manager,

My name is Nathan Wynn; I'm an undergraduate Computer Science student at the University of Georgia with a minor in Spanish. I am interested in applying for the Application Programmer position at the University of Georgia.

Some of my greatest passions in life are building things that fill a need and help others achieve their potential, which is why I believe I would provide unique benefit in this role. I am pursuing software engineering as a career because of the enormous potential for technology to be a driving force for change and source of improvement for people's lives. I have experience in Java development from my internship with Seller Labs and through my TA experience, and am fluent in C++, React, JavaScript, Python, and C#, as mentioned on my resume. In addition to having strong technical competency, I also place a high importance on communication and interpersonal skills. My previous experience with an Agile development team and as a strategic product management intern at Turner Broadcasting System has given me greater strategic thinking skills, as well as presentation, public speaking, research, and written communication skills that give me unique opportunities to provide benefit for the University of Georgia.

My phone number is (762) 436-9384, and you can also reach me at my email address: nww15119@uga.edu. If you would like any further information, please feel free to call or email me. Thank you for taking the time to review my application.

Sincerely,

Nathan W Wynn
